

## **Primepoint Adds Benefit Administration Services through Partnership with eMergent Benefit Solutions**

*Primepoint, through a partnership with eMergent Benefit Solutions, can now offer web based employee benefits administration services that are fully integrated with its payroll and HRMS technology.*

([PRWEB](#)) August 03, 2011 -- Primepoint, through a partnership with eMergent Benefit Solutions, can now offer web based employee benefits administration services that are fully integrated with its payroll and HRMS technology. Payroll, HR, and benefits administration are simplified by this integration of eMergent's industry leading technology platform called eLECT, with Primepoint's best in class payroll and HRMS solutions.

"eMergent Benefit Solution's eLECT platform sets the industry's technology standard for employee self-enrollment benefits administration and communication," said Alex Bothwell, Chief Executive Officer of Primepoint. "Combining eLECT with our technology makes for an automatic and seamless integration between an employee's benefits selections and the employee's data in the payroll and HR systems.

The eMergent Benefit Solution's eLECT platform provides benefit enrollment, employee communication, HR efficiency, and health and wellness promotion. Employees can easily access and enroll in multiple benefits from one place, online, anytime.

This partnership has created a fully integrated solution for employers, enabling the automatic integration of employee benefits data with the Primepoint payroll processing and HRMS systems. When companies hire or terminate employees, one data entry automatically updates all systems automatically and in real-time. Similarly, employee payroll deductions are automatically updated when a benefits change is made. The combined solution eliminates the need for entry of the same data into multiple systems, reduces billing discrepancies and ensures that the correct withholdings and deductions are processed for employees.

"The Primepoint and eMergent Benefit Solutions partnership offers one of the industry's only comprehensive employee management tools delivered via Software as a Service," said Gretchen Winterbottom, President of eMergent Benefit Solutions. "In addition, our TPA, consultants and broker clients who privately label the eMergent Benefit Solutions Platform can now offer the Primepoint payroll option to their employer groups if they choose, and Primepoint can do the same for their broker clients who take advantage of Primepoint's co-branding model."

This combined technology allows employers on the eLECT Platform to quickly take advantage of a complete payroll and benefit solution. Because the technology solution is delivered via Software as a Service, employers do not need to invest in hardware or manage complicated upgrades. eMergent Benefit Solutions and Primepoint continue to make updates to their respective software to keep up with changes in tax laws, regulations, business rules and customer expectations.

Lisa Lange, CEO of eMergent Benefit Solutions added, "Our goal is to leverage the Data Synch Web Service Facility to not only integrate the eLECT Platform with payroll providers, but broaden our services to integrate with insurance carriers, health exchanges, other HR software providers and employee wellness providers. This expanded functionality will drive efficiencies and improve the timeliness of how data is stored and reported between employee management service providers – a long needed improvement in the market."

#### About eMergent Benefit Solutions

About the company: eMergent Benefit Solutions is a privately held software and consulting firm located on the East Coast focused on providing Employee Management Solutions using Six Sigma methods to improve business processes. Our expertise is rooted in decades of experience in employee benefits administration and administration consulting. EBS's eLECT product was designed and built by Benefits Administration experts and intrinsically operates as an integrated solution.

EBS's SaaS based solution, eLECT, has received rave reviews from Industry expert John Nail, Founder of Employeease and the Industry Radar. ([www.electhsolutions.com](http://www.electhsolutions.com))

#### About Primepoint

About the company: Primepoint is a payroll and HR technology company offering the capability to integrate payroll processing, time and labor management solutions, and HR related business services for organizations employing from 1 to thousands of employees. The company is positioned to offer 21st century technology for advanced solutions, and seamless integration, along with better service. Payroll processing customers have several different options depending on company size, needs, and operational style. Some customers simply fax in payroll, others use a powerful web interface, and others use a full enterprise human resource option, as well as advanced time and labor management hardware and software. Primepoint's advanced technology enables integration with many payroll related services, such as retirement plan management, employee benefits, and workers' compensation premium payment processing.
